

BISHOP WISECARVER®

HANGING OUT WITH FUTURE ENGINEERS AT SUMMER CAMP:

Our founder Bud Wisecarver is always looking for ways to stay involved in the local academic community. This summer, he volunteered as an advisor at a local engineering summer camp for high schoolers looking to earn some college credit. Some of us shadowed him this past week to see what he was up to ... and to catch up with some of the students he was mentoring.

Read our Motion Monday blog post that goes with this puzzle, then take a crack at trying to solve it.
