

## GET THOSE TOUGH QUESTIONS ANSWERED!

The DualVee guide wheel is our signature product — it's a sleek, elegant design that can handle the toughest, dirtiest application environments. Take a crack at this word search puzzle and come out an expert on all things DualVee.

**What are 'Pitch,' 'Roll,' and 'Yaw?'** Pitch is a term used to describe a vehicle's tendency to rotate forward or backward. Yaw is a term that describes a vehicle's tendency to turn left to right with respect to the direction of travel. Roll is a term that describes a vehicle's tendency to rotate side to side with respect to the direction of travel.
