

February 28th 2014: PRODUCT STATUS NOTIFICATION – MinVee® Track Mounting Spacer MV0S18H

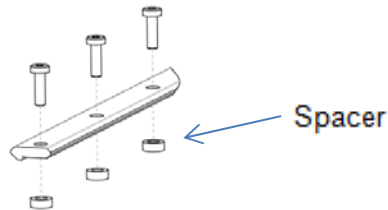

Bishop-Wisecarver Group is informing you of the obsolescence of components from the MinVee® miniature linear guide product line.

Upon depletion of inventory the following products will be discontinued and will no longer be available:

BWC Product Line	Obsolete Stock Code	Product Description
MinVeee	MV0S18H	MinVee Size 0 Track Support Spacer

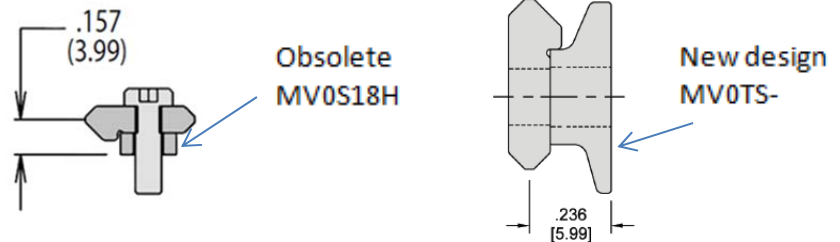

The track spacer is an optional small washer type standoff used for mounting the MinVee® track. These track spacers are sold in quantities of “each” and the required quantity should match the number of holes on the track.

See image.

The MV0S18H track mounting spacer has been discontinued and replaced by an improved track mounting method via a support extrusion made from 6061-T6 aluminum. This new MinVee® track mounting method provides continuous support to the track along the entire length and is available for all standard catalog track lengths. When ordering, the quantity is 1 each per length of track.

The new track support has slightly taller mounting height (0.079” taller).

To support your application needs, please use the following codes when ordering track supports:

Track Support	Stock Codes		Standard Lengths (inches)	# of Holes
	Drilled Track			
	Hardened	Soft		
MV0TS-650-4	TD0-650-4	TDS0-650-4	6.50	4
MV0TS-1250-7	TD0-1250-7	TDS0-1250-7	12.50	7
MV0TS-1850-10	TD0-1850-10	TDS0-1850-10	18.50	10
MV0TS-2450-13	TD0-2450-13	TDS0-2450-13	24.50	13
MV0TS-3050-16	TD0-3050-16	TDS0-3050-16	30.50	16
MV0TS-3650-19	TD0-3650-19	TDS0-3650-19	36.50	19

Available made-to-order with user specified length, hole spacing, and machining
